

Intelligent Care Coordinator **Direct**

Interoperability...Without Barriers.

Intelligent Care Coordinator optimizes referral placement and the coordination of care to improve outcomes. Now with ICC Direct, healthcare providers can seamlessly create referrals and exchange clinical documents electronically from their EHR, and universally deliver them to any receiving provider. No integration fees. Unlimited access. Supports accountable care, MU2, and CCM compliance.

ICC Direct is available now for all ICC subscribers at no additional cost. With ICC Direct, now you can:

Automate the Referral Process

Streamline the referral process and ensure the exchange of clinical documents is connected to the referral workflow. Maintain visibility into patient status and close the loop on care, while keeping all clinical documentation in the EHR.

Deliver Clinical Documents Universally

Share documents & refer patients electronically to any provider across the community, whether or not they have an EHR or Direct messaging capability; even if they aren't an ICC subscriber.

Realize the Benefits of Standards-based Interoperability

The fast & easy way to comply with MU2 Core Objective 15 (exceed the 10% measure), comply with the electronic exchange requirements for Chronic Care Management (CPT code 99490), and establish the foundation necessary for clinically integrated accountable care.
